

GLS LIGHTING AND CONTROLS SPOTLIGHT

Are You Looking For a Simple Yet Elegant 7" Touchscreen?

Here it is... ETC EchoTouch.

The ETC EchoTouch is a simple, economical, 7" touchscreen and is designed to operate lighting as a standalone controller (direct DMX/sACN) or as part of an ETC Echo distributed lighting control system. (ETC EchoConnect bus.) Perfect for simple touchscreen control of color changing lights in your RGBW boardroom cove or building exterior FX lighting. Installation is a snap using a standard 3 gang backbox and a 24VDC remote power supply or POE.

Programming is also simple and fast with EchoTouch's onboard editor allowing local configuration of touchscreen pages, setup of zones, fixtures, scenes, sequences, and time clock events. Yes, if you have the patience to read instructions, you can program your EchoTouch to your preferences - no field service technician required!

While EchoTouch is simple and economical, it also offers many native features only available from touchscreens connected to higher cost lighting control network systems. (See the EchoTouch data sheet for all hardware and software features.)

Applications:

- Meeting Rooms
- Lobbies
- Exterior FX Lighting
- Hospitality
- Health Care
- Retail
- Houses of Worship
- Public Event Spaces
- Small Entertainment Spaces
